

Hi-TV415

Multifunctional remote control system

Hi-TV415 is a touch screen remote control suitable for the management of both individual systems and systems consisting of several units in cascade.

Hi-TV415 integrates the temperature sensor to also allow the management of the room thermostat function.

Hi-TV415 is presented with a very intuitive color interface that simplifies the use of control; all functions are easily adjustable thanks to the use of synoptics of immediate understanding.
